

COVID-19 School Screening

Every morning, before sending your student(s) to school, please check the following:

➔ If "yes" to any of these questions, **DO NOT** send your student(s) to school. Instead, refer to your school's Return to School Guidance or contact your school. Strongly consider COVID-19 testing if not already done.

1 Has your child experienced any of the following symptoms since last attending school?:

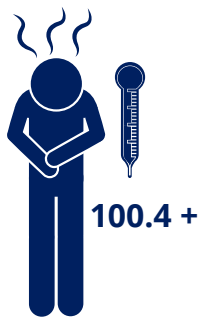

SYMPTOMS OF COVID-19

Cough

Shortness of breath

Fever

Headache

Muscle or Body aches

Chills

Sore throat

Congestion or Runny Nose

Loss of taste or smell

Nausea or Vomiting

Fatigue

Diarrhea

2 Has your child tested positive for COVID-19 within the past 10 days OR is awaiting test results?

3 Has your child been in close contact (within 6 feet for more than 15 minutes) or lived with anyone with confirmed with COVID-19 within the past 14 days?

COVID-19

Return to School Guidance

Situation	Can return to school
<input type="checkbox"/> Close Contact with Positive Case or Probable Case *Return to school guidance applies, regardless of negative test result	Symptomatic <ul style="list-style-type: none"> • 10 days after symptoms started and • At least 24 hrs fever free (without use of fever-reducing medication) and • Other symptoms have improved No Symptoms <ul style="list-style-type: none"> • 14 days after last contact with positive case (can be waived for essential employees who remain symptom-free and can adhere to safety precautions)
<input type="checkbox"/> Positive COVID-19 Test	Symptomatic <ul style="list-style-type: none"> • 10 days after symptoms started and • At least 24 hrs fever free (without use of fever-reducing medication) and • Other symptoms have improved No symptoms <ul style="list-style-type: none"> • 10 days after test collection date
<input type="checkbox"/> Any <u>Class A Symptoms</u> or <input type="checkbox"/> 2 or more <u>Class B Symptoms</u> of any duration or <input type="checkbox"/> 1 or more <u>Class B Symptoms</u> lasting more than 24 hrs and No Known Exposure or Close Contact	With negative PCR COVID-19 Test Result and/or alternative diagnosis from HCP that explains all symptoms <ul style="list-style-type: none"> • 24 hrs fever free (without use of fever-reducing medication) and • Other symptoms have improved or • Per condition diagnosed by HCP (whichever is longer) Without COVID-19 Test or HCP diagnosis <ul style="list-style-type: none"> • 10 days after symptoms started and • 24 hrs fever free (without use of fever-reducing medication) and • Other symptoms have improved
<input type="checkbox"/> 1 <u>Class B Symptom</u> that resolves within 24 hrs and No Known Exposure or Close Contact	<ul style="list-style-type: none"> • 24 hrs fever free (without use of fever-reducing medication) and • Other symptoms have improved

Symptoms Consistent with COVID-19 (not related to a pre-existing condition)

Class A Symptoms

- Fever (100.4 or over)
- Cough
- Loss of taste or smell
- Shortness of breath or difficulty breathing

Class B Symptoms

- Fatigue
- Headache
- Muscle or body aches
- Sore throat
- Congestion or runny nose
- Nausea or vomiting
- Diarrhea (2 or more loose stools in 24 hrs)

Close Contact: Individuals within 6 ft for a cumulative total of 15 or more minutes over a 24 hr period to a confirmed case during the infectious period

Probable Case: Symptoms and Close Contact with Positive Case

Infectious Period: Begins 48 hrs prior to symptom onset

Alternative Diagnosis: Lab-confirmed diagnosis such as strep throat or viral pathogen. Can also include childhood rash illness, acute otitis media, etc. (COVID-19 test still strongly recommended in addition)
